

ADSG AWARDS 2023 - RECOGNISING SUSTAINABILITY LEADERSHIP IN THE REGION BEST ENERGY MANAGEMENT INITIATIVE AWARD APPLICATION FORM

Organisation name:
Short description of the submission:
Name of person making the submission:
Position:
Phone number:

Email:

DEFINITION: This award is for initiatives that demonstrate or implement energy efficiency measures. This could cover any organisational initiative aimed at improving the energy efficiency within an organisation or the wider community, through the design and implementation of materials, systems, software and supply chains; and / or which have been able to reduce their carbon emissions and energy waste.

This award will be judged on the following criteria:

- **Integration of energy:** How has energy management been integrated? Including energy management as a core aspect of a project brief, or as a fundamental aspect of an organisation's regular agenda, policies, roles, strategy and governance structure is critical. Submissions need to demonstrate that energy management activities are not merely one off or discretionary.
- **Plan/Do/Review cycle:** Demonstrate how the energy management initiative was planned, implemented and reviewed. Keeping track of the plans and checking the results against objectives/ targets, described in action plans, is key to truly sustainable achievements.
- **Impact:** All submissions need to address what energy management impact was achieved. Sustainable performance must drive real impact.
- **Innovation and thought leadership:** How was the energy management initiative different from business as usual? Sustainability challenges require new ways of doing things or new ways of approaching existing activities. Submissions should demonstrate the thought leadership and innovation that took place.
- **Communication and engagement:** Submissions must demonstrate that engagement and communication that supported effective energy management took place. Promoting transparency to all stakeholders through internal/external engagement & communication is key to realise the benefits from sustainable actions.
